

SYSTEMS HEALTH CARE WORKSHOP SERIES

This 50 hour course held over four weekends will teach you the entire Systems Health Care protocol and techniques. You'll finish the course feeling confident in your ability to treat even the most difficult case, from musculoskeletal problems to visceral dysfunctions. Basic manual muscle testing skills are required.

- Identify primary problems by finding and treating patterns in a systematic and individualized progression.
- Recognize the difference between compensations and adaptations, and treat accordingly.
- Learn how to precisely diagnose health concerns using different types of muscle testing procedures combined with visceral referred pain patterns and other associated factors.
- Efficiently treat accordingly to physiological hierarchy so that health issues remain resolved.
- Discover new muscle testing and treatment procedures that can apply to all patients, as well as biochemistry and nutrition protocols, tips and insights, and a whole lot more!

DATES:
1. September 16-17, 2017
2. October 14-15, 2017
3. November 4-5, 2017
